Elucidation of the complicated scenario of primate *APOBEC3* gene evolution

Keiya Uriu, Yusuke Kosugi, Narumi Suzuki, Jumpei Ito, and Kei Sato

Supplemental Datasets

Dataset S1. Information for the primate genomes analyzed in the present study.

Dataset S2. Information for the primate AID/APOBEC-related genes identified in

the present study.

Dataset S3. Results of the dN/dS ratio test with MEME.

Dataset S4. LiftOver chain files used in this study.

Dataset S5. Information for the Z domain sequences used as queries in the tBLASTn search.
